

## SINTERED BUSH CHAIN

Sintered bush chains are recommended for application where lubrication is often not possible like food processing, printing, pharmaceuticals and electronics.

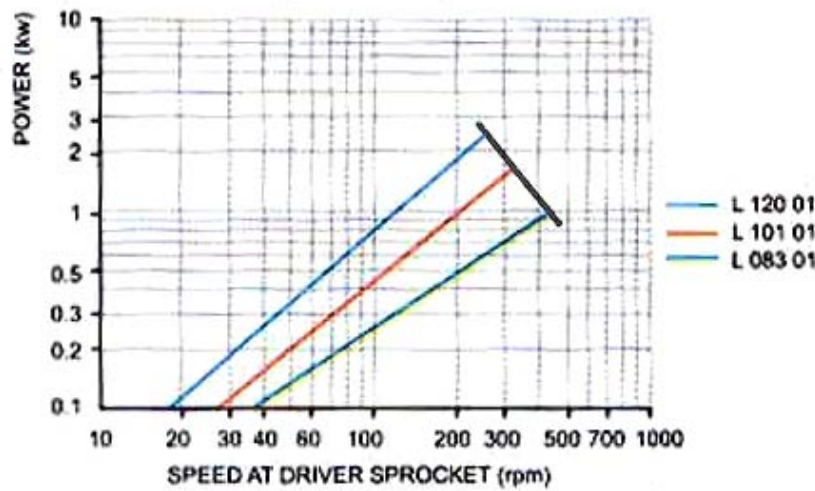

| intl Ref No. | Chain No. | Pitch (P) | Width between inner plates (W) (Min) | Roller dia (d) (max) | Plate height (h) (max) | Width Over Bearing Pin (a) (max) | Bearing pin dia (d) (max) | Width Over Joint Fasteners (b) (max) | Projected Bearing Area Sq.cm | Avg Weight Per Meter (kg) | Tensile Strength (kgf) (min) |
|--------------|-----------|-----------|--------------------------------------|----------------------|------------------------|----------------------------------|---------------------------|--------------------------------------|------------------------------|---------------------------|------------------------------|

These chains are designed for clean environment application where greasing is often possible: like food processing, printing and pharmaceuticals. The bush has a unique powder alloy steel composition, that allow it to be impregnated with a special oil. Offers a wear-life up to two times in excess of standard chains.
