

SAILENT FEATURES

- *Compact totally enclosed, continuously lubricated (with SPINTEK-12/ Servopsin – 12Oil) drives
- *Simple mechanical device with practically no maintenance
- Absence of noise and vibration
- *Co-linear input & Output shaft can rotate in either direction.
- *Transmission of power through best quality hardened steel components which are ground to very close tolerance.
- *Reliable speed holding capacity at maximum load
- *Having minimum speed one seventh of input speed and maximum speed 1.7 times input speed.
- *For general application speed range offered 300 rpm – 1500 rpm or 200 rpm – 1000 rpm for an input of 1500 rpm or 1000 rpm respectively.
- *drive suitable for constant horse power/constant torque/Variable torque load application.

ADVANTAGES

- *High Power Capacity
- * High Efficiency of 85% to 94%
- *High reliability and long life
- *High output Torque up to 6 times the input Torque
- *High Speed holding capacity of 0.05% nett.
- *Infinitely variable output speed between lowest 1/7 th of input speed and highest 1.7 times of input speed.
- *No slippage
- *No maintenance except change of oil
- *Suitable for Dusty, Dirty, Flame proof and Wet environment
